ABOUT

An Informatics student with experience in game programming, game design, graphic design, and UI/UX design through various academic and personal projects. Familiar with the game development process, from designing gameplay mechanics and game flow to creating user interfaces and user experiences. Detail-oriented with the ability to identify issues, evaluate game functionality and visual elements, and provide thoughtful feedback. Able to work collaboratively, adapt to new challenges, and eager to contribute to the game testing and quality assurance process.

EDUCATION

Institut Teknologi Nasional Bandung 2021- Present
• S1 Informatics | IPK : 3.64 / 4.00

ORGANIZATION

Public Relations & Design Staff July 2022 – July 2023
Himpunan Mahasiswa Informatika Itenas (HMIF)
• Designed posters and visual content for commemorative days and organizational social media.
• Managed and maintained the organization's social media accounts to support communication and content distribution.
• Actively participated in various organizational committees and events.
• Collaborated with team members to prepare and execute organizational events and activities.

WORK HISTORY

Cyber Security Engineer Intern – PT. Dirgantara Indonesia June 2023 – August 2023
• Designed and implemented network security systems using pfSense as a firewall and Suricata as an Intrusion Detection and Prevention System (IDS/IPS).
• Conducted security testing to identify system vulnerabilities and evaluate the effectiveness of firewall and IDS/IPS configurations.
• Performed troubleshooting and analyzed test results to identify issues and improve system reliability.
• Developed strong attention to detail and problem-solving skills through systematic testing and issue identification.

Multimedia Laboratory Assistant – ITENAS September 2024 – January 2025
• Guided students in learning and applying multimedia software such as Adobe Animate, Photoshop, Premiere Pro, and Blender.
• Assisted students in troubleshooting technical issues and improving their multimedia projects.
• Reviewed students' final projects and provided constructive feedback to improve their visual quality, functionality, and overall user experience.
• Communicated technical concepts clearly while working with students from different levels of experience.

Independent Study Game Developer – Infinite Learning September 2024 – December 2024
• Worked as a Game Programmer in a team-based game development project, contributing to gameplay mechanics and core game systems.

- Implemented and tested gameplay features to ensure functionality, responsiveness, and consistency during development.
- Collaborated with game designers, artists, and other team members to integrate gameplay, visual assets, and user interface elements.
- Participated in playtesting sessions to identify bugs, gameplay issues, and areas for improvement.

SOFT SKILL

- | | |
|----------------------------------|----------------|
| • Teamwork | • Creativity |
| • Ability to work under pressure | • Adaptability |
| • Time management | |

HARD SKILL

- | | |
|---------------------|------------------|
| • Quality Assurance | • UI/UX Design |
| • Game Design | • Graphic Design |
| • Game Programming | • Figma |
| • Unity | • Git/GitHub |

PROJECT

Speedious - Game Desktop (Unity)

Design and develop a 3D cartoon-style desktop racing game that allows players to choose a vehicle and compete against AI.

Coin Rush - Game Desktop (Unity)

A third-person game where players collect coins to increase their score while avoiding coins that reduce points. Focused on exploration, decision-making, and gameplay mechanics.

Mathster – Game Browser (Construct 2)

Educational game designed for elementary school students to learn and practice basic mathematics through interactive and engaging gameplay. Players solve math problems while completing challenges, making the learning process more enjoyable and interactive.

Thalos : The Dark Descent - Game Desktop (Unity)

A 2.5D RPG hack-and-slash game inspired by Greek mythology. Players explore a dark world, fight various enemies, collect resources, and progress through challenging encounters. The game features combat mechanics, enemy AI, inventory and shop systems, as well as exploration and player progression.

Cafe Makmur Itenas - DesktopApp (Java)

A desktop-based application designed for a point-of-sale system capable of handling transactions, specifically tailored to the operational needs of a café.

Sign Language Detection Application - DesktopApp (Python)

A real-time Indonesian Sign Language recognition application that uses computer vision and machine learning to recognize hand gestures and translate them into corresponding words.

Solar System Learning App – DesktopApp (Adobe Animation)

An educational application that explains the structure and elements of the Solar System, ranging from the Sun and planets to other objects. It is designed to boost students' interest in learning through engaging and informative visuals.
